

ASTRALAMP

Contemporary Vigil Lamps Designed For Mausolea

SUPPLIED BY SEATON DELAVAL PTY. LTD.

ASTRALAMP

Contemporary Vigil Lamps Designed For Mausolea

Astralamp is an innovative vigil lamp and vase system designed and manufactured in Australia specifically for mausolea.

Since 1997, Astralamps have been installed in mausolea in cemeteries across Victoria including Fawkner, Springvale, Melbourne General, Keilor, Mildura, Geelong, Box Hill, Lilydale, Cheltenham and Werribee.

Astralamps are supplied by Seaton Delaval Pty Ltd, a sponsor and corporate member of the CCAV in Victoria.

Astralamp Jewel

*St. Mary of The Cross
Mausoleum, Melbourne
General Cemetery*

Astralamps have been designed to eliminate problems often occurring with other products such as corrosion, water staining of shutter stone, high lamp maintenance, water overflowing onto lamps and insufficient vase size for flowers.

Astralamps have been designed and refined over a 20 year period and offer a product to the cemetery industry that is unique & unequalled in Australia.

MAIN FEATURES OF ASTRALAMP

- Designed & made in Australia
- Strong & durable aluminium extrusion
- Marine grade anodised finish
- LED illumination
- Randflex cemetery industry standard UV stabilised polypropylene vase
- Mounts clear of shutter to prevent water staining stone
- Light weight & easy to install
- High level vase placement equipment available
- Supplied with dust caps for protection until time of interment
- Two designs and a range of colours
- Left or Right handed lamps suit paired crypt fronts

PRODUCT RANGE

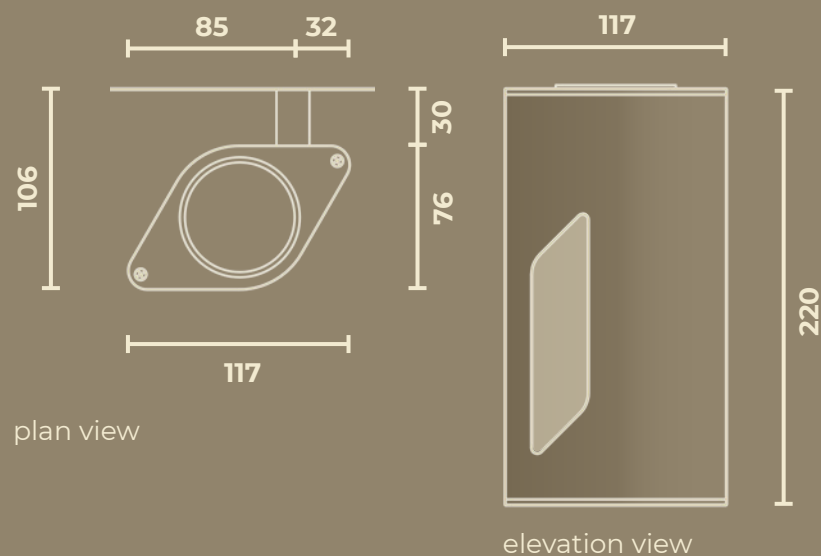

MODELS

ASTRALAMP - DIAMOND

MODEL NO:

LEFT HAND | AL05 - LH

RIGHT HAND | AL05 - RH

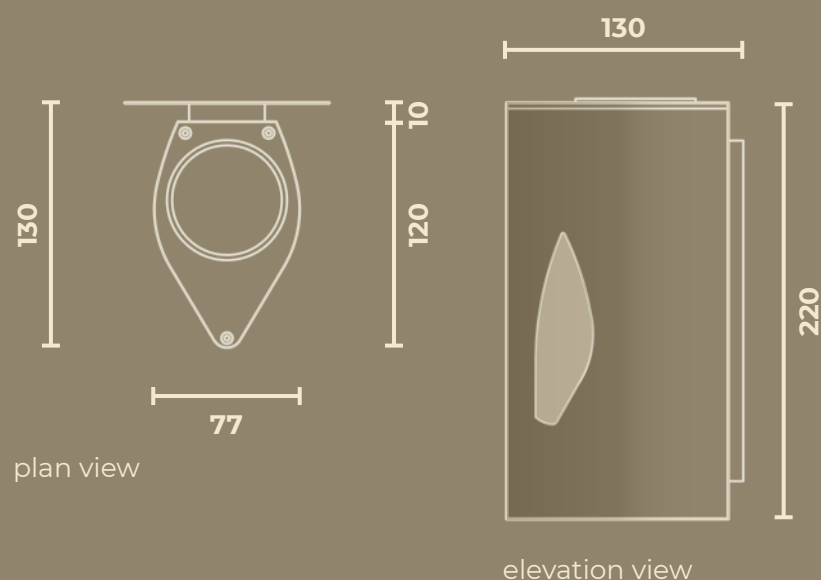

ASTRALAMP - JEWEL

MODEL NO:

LEFT HAND | AL04 - LH

RIGHT HAND | AL04 - RH

PRODUCT RANGE COLOURS

Available in the following standard
anodised colours:

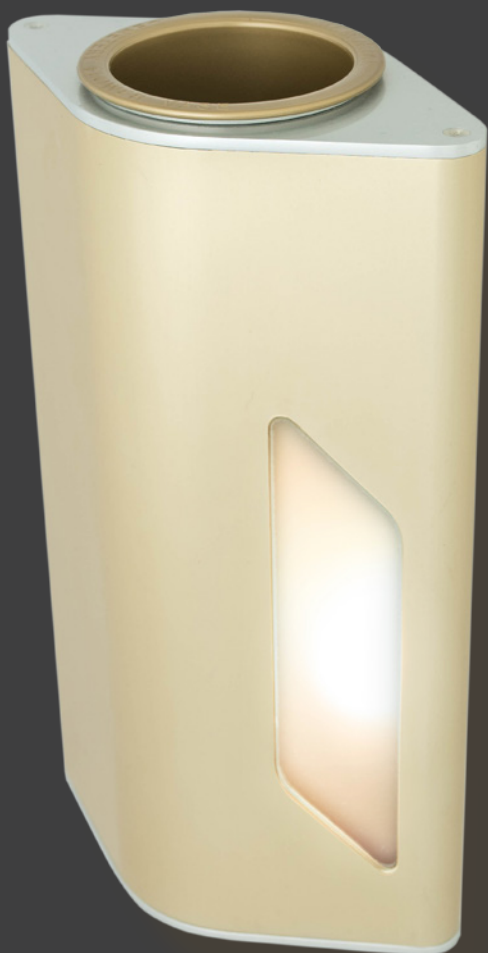

Smokey
Quartz

Champagne
Gold

Custom anodised colours are also
available upon request.

PAIRED LAMPS

**Left Handed
Astralamp Diamond**

**Right Handed
Astralamp Diamond**

Astralamps are available in left and right handed models to suit location on crypt shutters.

Left and Right handed lamps are often used to signify a companion pair of crypts.

PRODUCT ACCESSORIES

DUST CAPS

Astralamps are now supplied with an integrated dustcap that protects the lamp until time of use.

The dustcap fits snugly onto the Astralamp body and is easily removed at the time of interment.

Dustcaps are available for Diamond and Jewel models.

Astralamp Dustcaps - Diamond Model

Astralamp Dustcaps - Jewel Model

PRODUCT ACCESSORIES

HIGH LEVEL ACCESS

Vase Lifting Device

Astralamps can be provided with vase clips and an extendable pole for accessing high level vases if required.

The vase lifting device has been designed to prevent flowers from tipping over during use.

Use of the vase lifting device allows flowers to be replaced after interment without the use of ladders or mobile platforms.

CARE & MAINTENANCE

ASTRALAMP

The Astralamp is designed to provide high levels of durability in an exterior environment. The following care and maintenance procedures must be followed to ensure the best performance of the lamp.

1. Do not overfill vases with water. Drain holes are provided in the base of the lamp and a flange to the top plate is designed to minimise flow of water to the lamp interior.
2. Do not use chemical additives in vase water to freshen flowers. Any alkaline substances may damage the finish.
3. Keep the interior of the lamp clean and free of leaf and flower debris, insects and dirt.
4. Clean all aluminium surfaces of the lamp using only warm mild soapy water and thoroughly rinse.

General cleaning of the finish should be by non-acidic non-alkaline cleaners such as 'Methylated Spirits'.

5. The lamps should be regularly cleaned at an interval of not more than once every 3 - 6 months.

WARNING: Do not use alkaline based cleaners of any kind as damage to the anodised finish may occur.

DUST CAPS

Astralamp vigil lamps are supplied with dust caps that are designed to protect the top of the lamp from moisture and grime.

It is intended that the dust cap will be removed at the time of interment and discarded and recycled or returned to the cemetery.
